Re: John P. Saad Case  
Davidson and Rutherford Counties, Tennessee

Dear Fred:

Attached is a list of all known chemicals involved at the various sites in this case. From our meeting on March 23 I understand that EPA may be interested in doing some type of survey in the near future to try and determine if chemicals still exist below the surface and if clean-up is possible. Please keep in touch regarding your actions.

Sincerely,

*Barry*
